

HASNAIN KHAN

Full-Stack Developer · React / Next.js · Node.js · AI Automation

Islamabad, Pakistan · +92 314 0972575 · hasnainwebdeveloper1122@gmail.com

Full-stack developer building production web applications with React, Next.js, and Node.js. Delivered responsive e-commerce storefronts, custom CRM tools, and workflow-automation interfaces for clients across Pakistan and the Gulf, with a growing focus on AI-assisted automation using n8n and LLM APIs. Comfortable owning features end-to-end — UI, API, database, third-party integration, and deployment — and collaborating with senior engineers on production releases.

EXPERIENCE

Full-Stack Developer — Freelance / Contract 2023 – Present

Client work across e-commerce, SaaS, and internal-tools projects. Owned delivery from design to deployment.

- **React & Next.js applications:** shipped responsive, component-driven front ends for e-commerce and SaaS clients — routing, state management, API integration, and performance work (code-splitting, image optimization, Lighthouse tuning).
- **Node.js backends:** built Express APIs with MongoDB persistence, authentication, role-based access, webhooks, and third-party integrations (payment gateways, shipping providers, CRM systems).
- **E-commerce delivery:** developed and customized Shopify storefronts and headless e-commerce sites — theme development, cart and checkout customization, custom app integrations.
- **AI & workflow automation:** built n8n automations connecting webhooks, LLM APIs, and CRM tools to eliminate repetitive manual steps for client operations teams; integrated OpenAI and Anthropic APIs for content and support flows.
- **CRM & admin tools:** delivered custom CRM applications helping clients manage customers, orders, and internal pipelines — replacing spreadsheet workflows with proper interfaces.
- **Cross-team collaboration:** worked with senior engineers — including Hamza Hamid, Forward Deployed AI Engineer (Dubai) — translating requirements into shipped features on production stacks.

PROJECTS

FlowGenius — flowgeniuss.netlify.app

Workflow-automation web application. React front end with a component-driven UI for building, running, and monitoring automated workflows. Focused on clean UX, responsive layout, and smooth interaction across devices. Deployed on Netlify.

Helpix AI — helpixai.netlify.app

AI-assisted user-support product. React front end deployed on Netlify, wired to AI backend endpoints for real-time assistance flows. Custom UI for conversational interaction and response streaming.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Sass, responsive design, cross-browser compatibility

Backend: Node.js, Express, Python, MongoDB, RESTful APIs, webhooks, authentication

AI & Automation: n8n workflow automation, LLM API integration (OpenAI, Anthropic), prompt engineering, AI-assisted feature development

E-commerce: Shopify (theme development, app integration, custom storefronts), payment gateway integration, third-party API integration

Tools & Platforms: Git, Docker, Webpack, NPM, Netlify, Vercel, Figma, Adobe XD, Agile / Scrum

EDUCATION

F.Sc (Pre-Engineering) — Quaid-e-Azam College, Nowshera 2023 – 2025
